# What is a UDI?

Required on the device label, packages or, in some cases, on the device itself (in plain text and machine readable format (AIDC))

The labeler of a device must provide the information required for each model or version

UDI = DI + PI

Patient

- Who made it?
- What brand it is?
- What model?
- Has it been recalled?
- Impact on other care?

Population

- Did it hasten other conditions?
- What was expected life of the device?
- Did it last longer than that?
- How to analyze UDI data to support innovation?

# 2017 – Realizing UDI Value

**Goal: UDI in data sources of acceptable data quality such that it realizes public health and economic return on investment across the device ecosystem**

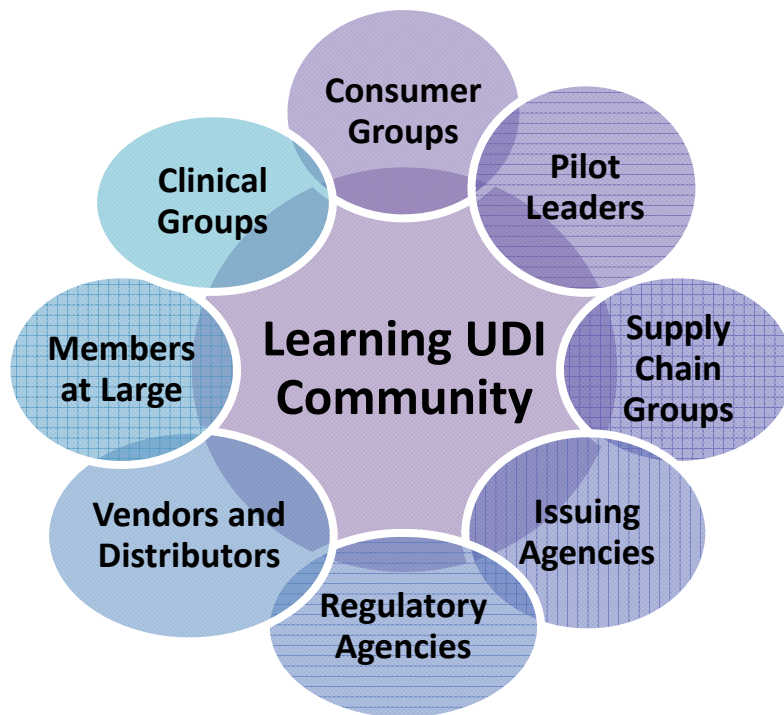

**Demonstrate and improve value through device initiatives such as:**

- **Medical Device Innovation Consortium (MDIC) National Evaluation System for health Technology (NEST)**
- **Medical Device Epidemiology Network (MDEpiNET)**
- MDIC Case for Quality (CFQ) – dashboards for purchase decisions
- Association for Healthcare Resources and Materials Management (AHRMM) Learning UDI Community (LUC)
- International Medical Device Regulators Forum (**IMDRF**)

# AHRMM LUC

## Learning UDI Community

- Major Objectives:
  - Identify UDI adoption hurdles
  - Identify UDI adoption solutions
  - Host in the LUC Resource Center

# International Medical Device Regulatory Forum

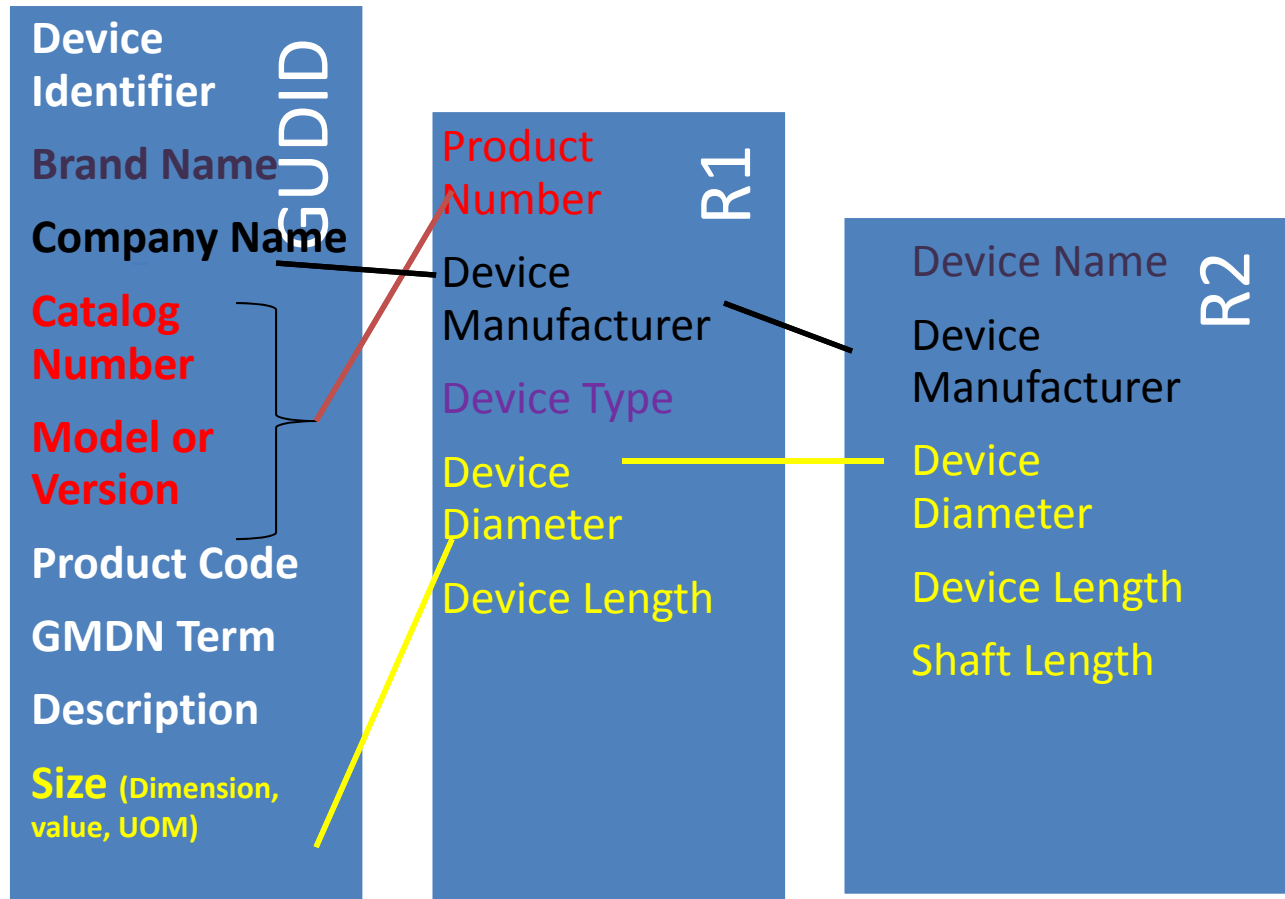

## 2013 – UDI principles and attributes created by IMDRF
